EXPERIENCE

Cargo Fleet

Jun 2022 - Present

Frontend Engineer

Chicago, IL

- Created an admin dashboard using React functional components; integrated with 5+ APIs to fetch and display real-time data.
- Wrote React Components to display the data from API calls
- Used Material UI to style the application
- Improved application performance by 20% through implementation of Redux Toolkit.
- Implemented full CRUD functionality in React components utilizing Axios.
- Optimized app navigation experience by implementing advanced routing techniques with React Router.
- Tested React components using React Testing Libraries.

Analytical Flavor Systems, Inc

Jan - May 2019

Frontend Developer Intern

New York, NY

- With a team of 6 fellow interns created a mobile responsive UI for the admin console from scratch.
- Collaborated with senior developers to implement user interface of an admin console page design using HTML, CSS, and JavaScript, resulting in a 20% improvement in mobile responsiveness.
- Added the functionality of switching metadata, editing, updating user reviews to the admin console.
- Assisted in identifying and resolving frontend bugs and issues, contributing to a 25% decrease in reported user interface errors.
